**Pioneering
global eSports
development.**

ER Esports is an advanced approach of eSportsenterprise that offers diverse all-about-eSports activities like experiencing, professional training, live event planning, tournament organizing and academic education.

This company aims to create an interwoven system covering key areas of the emerging eSports market, from providing latest eSports news to eSports campaign setup and production, and ultimately enhancing the professionalism of eSports and promoting the positive impact of eSports for all ages in Hong Kong.

Our Service

ER Sports has been using our partner Aoba Hopkins' services "Odoo solutions" for the online business. To enhance the market expansion, offline business is a need.

TT Retail is honored to help our client provide an offline POS solution- "Pay at the table". ER Sports could easily access and receive the payment via offline store, while integrated with their Odoo ERP system. ER Sports could process transactions by using TT Retail POS system along with EFT's payment gateway. Our integrated solution provided a all rounded system which helped ER Sport to reduce development cost.
